RE: Galia Housing

To Whom it May Concern:

As a Program Director at Columbia River Mental Health, I oversee several housing programs, providing a Housing First model of service to several clients with behavioral health and SUD history. Galia Housing has been an integral part of our process on numerous occasions, as we explore clean and sober living opportunities for those we serve. Braiding these resources together creates an opportunity for these individuals beyond what a Supported Housing program can provide as a stand-alone service. The staff of Galia Housing have been a pleasure to work with, are communicative, collaborative, and an asset to our community. I would highly recommend that they be recipients of additional funding, when available, to continue and to expand upon the wonderful work that they already do.

Kindly,

Misty Pelagalli

Program Director

Columbia River Mental Health Services
